SPECIFICATION:

- leaf installation depth: 70 mm, frame 140 mm,
- glazing with packages up to 41 mm,
- modern, classic-line design,
- hidden mechanisms,
- available in a variety of colours,
- bonding inside technology can be used,
- stability and possibility to create large constructions (up to 5.85 x 2.5 m),
- tightness at the very high level,
- space saving (no need to open door leaf wide to open the doors, i.e. the leaf does not “intrude” into the room),
- convenient operation (similar to lift and slide door types, HST type),
- available schemes: A + C.

SMART-SLIDE

RELIABILITY AND CONVENIENCE

Smart-slide sliding doors are a new solution for sliding doors/windows, an attractive alternative to PSK/PATIO type terrace doors.

Great for both single-family housing and public buildings requiring terrace doors which are reliable and easy to use.
